**ReneSola and Aberdeen Standard Investments Announce
the Acquisition of a 55MW Portfolio of Solar Assets in Poland**

Shanghai, China, Oct 4, 2019 – ReneSola Ltd (“ReneSola” or the “Company”) (www.renesolapower.com) (NYSE: SOL), a leading fully integrated solar project developer, and Aberdeen Standard Investments (“ASI”), a leading global asset manager, today announced that ASI acquired 100% stake in a 55 MW portfolio of ground-mounted solar farms developed by ReneSola.

The portfolio consists of 34 state-of-the-art individual projects with a total installed capacity of 55MW. All of the projects have been awarded a 15-year contract-for-difference (“CFD”) support mechanism, ensuring stability of electricity pricing for the projects. The portfolio of these solar projects is entirely located in Poland, mostly in the southwestern portion and at the center of the country.

Mr. Dominic Helmsley, Head of Economic Infrastructure at Aberdeen Standard Investments, commented, "This acquisition marks our fourth investment in the Polish renewable infrastructure market, as we continue to execute on our strategy to acquire and manage premium infrastructure assets in Europe. We are thrilled to play an active role in the development of renewable energy in Poland, in particular the solar PV sector, which is underpinned by a supportive regulatory framework. ReneSola and Aberdeen Standard Investments have worked together to complete a transaction that benefits all parties, and we look forward to expanding our cooperation in the future."

Ms. Shelley Xu, Chief Executive Officer of ReneSola, commented, "This transaction once again validates our ability to develop and monetize solar projects across the different geographies we serve. Our European team, under the management of our CEO of the European Region, Mr. Josef Kastner, has established Poland as a key market for us, and positioned ReneSola as one of the largest project developers in the country. With the completion of this transaction, we have demonstrated our strong execution in project development and our ability to realize profits from the sale of our projects, enabling us to generate cash flow and further strengthen our balance sheet. We are very excited to partner with Aberdeen Standard Investments, and look forward to building a solid relationship with the team over the long-term."

The acquisition of ReneSola’s projects is ASI’s fourth renewable infrastructure investment in Poland. ASI’s Economic Infrastructure programme focuses on investing in core infrastructure assets in Europe, and already holds ten other assets, including: (i) a gas distribution business in Finland; (ii) a portfolio of hydro-electric plants in Norway; (iii) three rolling stock assets in the UK; (iv) a stake in an offshore gas transmission pipeline in the Netherlands; (v) stakes in two district heating businesses in Finland; and (vi) refined hydrocarbon storage assets in Germany and the UK.

ReneSola Signs Agreements to Sell 22.3MW of China DG Projects

Shanghai, China, October 9, 2019 – ReneSola Ltd (“ReneSola” or the “Company”) (www.renesolapower.com) (NYSE: SOL), a leading fully integrated solar project developer, today announced that it entered into an agreement to sell eleven rooftop DG projects located in Zhejiang Province to a China state-owned enterprise specializing in the solar energy industry. Separately, ReneSola announced that it agreed to sell three small-scale DG projects located in Shanghai to a different undisclosed third party.

The eleven rooftop DG projects located in Zhejiang Province have an aggregate installed capacity of 20.6MW, and the three small-scale DG projects located in Shanghai have a combined capacity of 1.7MW.

Ms. Shelley Xu, Chief Executive Officer of ReneSola, commented, “These agreements once again demonstrate our ability to develop and monetize projects across the different geographies we serve. We believe our ability to execute our business plan will enable us to further strengthen our balance sheet and generate cash flow. With increased activity in project sales, our business momentum has accelerated, and we are confident in our revenue expectations for the third quarter and beyond. We continue to look for opportunities to monetize our China DG assets, as we transform into an asset-light project developer.”
