## Large Market Opportunity

The global solar power project development business is large and yet continues to grow. Industry market research estimates that by 2040, the share of renewables in the energy market will increase to around 30% and globally will become the single largest source of power generation. Europe continues to lead the way in terms of penetration of renewables. Renewable energy is expected to account for more than 50% of the European energy market by 2040. Both Europe and the U.S. are expected to be the two key markets driving the growth of renewables in the next several years. With our focus on the U.S. and European markets (primarily Spain, France, Germany, the U.K., Poland, and Hungary), we believe we are strategically positioned for growth.

Our Project Development business benefits from an intense focus on small-scale projects in diverse jurisdictions with a high PPA/FiT price that generates attractive returns. As of November 30, 2020, our total project pipeline was approximately 800 MW, and our late-stage pipeline was 732 MW, up from 500 MW in the second quarter of 2020. We continue to focus on profitable markets, including the U.S. and Europe, where we see tremendous growth opportunities with high-quality projects. Importantly, we intend to add incremental project pipeline in our core markets (the U.S., U.K., Spain, Poland, France, Germany, and Hungary) to reach 1GW by year-end 2020. Our teams around the world are dedicated, skilled, and experienced...and are supported by the foundation of our strong balance sheet.

## Attractive Profit-Optimized Project Pipeline

The development pipeline is strong. As of November 30, 2020, the Company's project pipeline was at around 800 MW, of which over 730 MW are late-stage projects and about 23 MW are under construction. We believe this pipeline portfolio is attractive due to its broad geographic diversification in Europe.

Late-stage projects include those with the legal right to develop based on definitive agreements, including those held by project Special Purpose Vehicles ("SPVs") or joint-venture project SPVs whose controlling power belongs to us.

The following table highlights our late-stage project pipeline by location:

Project Location	Late-stage (MW)	Under Construction (MW)
US	300.0	—
Poland	56.0	11.0
Hungary	40.0	11.7
France	100.0	—

## Strong Performance and Outlook around the World

### United States

Our late-stage projects total 300 MW, of which ~53 MW are community solar projects in Minnesota, Maine, and New York. Additionally, we have projects under development in Utah, Florida, and Maine. Meanwhile, we operate 24.1 MW of utility projects in North Carolina.

## Third Quarter 2020 Financial Details

### Revenue

Third quarter of 2020 revenue was \$9.7 million, up sequentially but down significantly year-over-year. Revenue reflected mostly the sale of electricity from the Company's operating assets. By nature, project sales are large with unpredictable timing, and quarterly revenue will often fluctuate significantly. The Company measures its success in project sales over longer periods, typically at least a year.

### Gross Profits and Gross Margin

Gross profit was \$5.9 million in the third quarter of 2020, yielding a gross margin of 60.6%. This result compares to a gross profit of \$7.4 million and gross margin of 28.4% in the second quarter of 2020, and a gross profit of \$16.2 million and gross margin of 24.6% in the third quarter of 2019. The sequential increase in gross margin mainly reflects the higher revenue contribution from high-gross-margin energy sales.

### Operating Expense and Operating Income

Operating expenses in the third quarter of 2020 were \$3.0 million, up sequentially and down year-over-year. Marketing expenses of \$76,000 were down both sequentially and year-over-year. General and administrative expenses of \$1.8 million were up sequentially and down year-over-year. The decrease in general and administrative expenses reflects the Company's commitment to disciplined expense control.

Third quarter 2020 operating income was \$2.9 million, compared to \$4.6 million in the second quarter of 2020 and \$7.4 million in the third quarter of 2019. Non-GAAP<sup>2</sup> operating income in third quarter of 2020 was \$4.5 million, compared to \$6.0 million in second quarter of 2020 and \$14.0 million in third quarter of 2019.

### Net Income

In the third quarter of 2020, net income attributed to ReneSola Power was \$2.1 million, compared to \$3.1 million in the second quarter of 2020 and \$2.4 million in the third quarter of 2019. Net income per share was \$0.04 in third quarter of 2020, compared to \$0.06 in the second quarter of 2020 and \$0.06 in third quarter of 2019.

Non-GAAP net income attributed to ReneSola Power in the third quarter of 2020 was \$2.5 million, compared to \$3.6 million in the second quarter of 2020 and \$8.9 million in the third quarter of 2019. Non-GAAP net income per share was \$0.05, compared to \$0.08 in the second quarter of 2020 and \$0.23 in the third quarter of 2019.

### Financial Position

Cash and equivalents were \$15.6 million as of September 30, 2020, compared to \$11.3 million as of June 30. Total current assets (as disclosed in appendix 2) were \$72.5 million as of September 30, 2020, compared to \$68.4 million as of June 30, 2020. Long-term borrowings were \$3.0 million as of September 30, 2020, unchanged during the quarter. Our long-term failed sale-lease back and finance lease liabilities associated with the financial leasing payables for rooftop projects in China were \$45.2 million as of September 30, 2020, compared to \$41.8 million as of June 30, 2020. Short-term borrowings were \$31.3 million as of September 30, 2020, down slightly from \$31.5 million as of June 30, 2020.

<sup>2</sup> Reconciliations to U.S. generally accepted accounting principles ("GAAP") financial measures from non-GAAP financial measures are presented below under "Use of Non-GAAP Financial Measures" in Appendix 4.

### Use of Non-GAAP Financial Measures

To supplement ReneSola Power's financial statements presented on a GAAP basis, ReneSola Power provides Adjusted EBITDA as supplemental measures of its performance.

To provide investors with additional insight and allow for a more comprehensive understanding of the information used by management in its financial and decision-making surrounding pro-forma operations, we supplement our consolidated financial statements presented on a basis consistent with U.S. generally accepted accounting principles, or GAAP, with EBITDA, Adjusted EBITDA, non-GAAP net income/ (loss) attributed to ReneSola Power and non-GAAP EPS as non-GAAP financial measures of earnings.

- EBITDA represents net income before income tax expense (benefit), interest expense, depreciation and amortization.
- Adjusted EBITDA represents EBITDA plus discount of electricity subsidy in China, plus share-based compensation, plus bad debt provision, plus impairment of long-lived assets, plus one-time penalty of postponed payables, plus loss on one-time settlement of disputed Turkish receivables, plus loss/(gain) on disposal of assets, plus foreign exchange loss/(gain).
- Non-GAAP net income/ (loss) attributed to ReneSola Power represents GAAP net income/(loss) attributed to ReneSola Power plus discount of electricity subsidy in China, plus share-based compensation, plus bad debt provision, plus impairment of long-lived assets, plus one-time penalty of postponed payables, plus loss on one-time settlement of disputed Turkish receivables, plus loss/(gain) on disposal of assets, plus foreign exchange loss/(gain).
- Non-GAAP EPS represents Non-GAAP net income/ (loss) attributed to ReneSola Power divided by the number of fully diluted shares outstanding.

Our management uses EBITDA, Adjusted EBITDA, non-GAAP net income/ (loss) attributed to ReneSola Power and non-GAAP EPS as financial measures to evaluate the profitability and efficiency of our business model. We use these non-GAAP financial measures to assess the strength of the underlying operations of our business. These adjustments, and the non-GAAP financial measures that are derived from them, provide supplemental information to analyze our operations between periods and over time.

We find these measures especially useful when reviewing pro-forma results of operations, which include large non-cash impairment of long-lived assets and loss on disposal of assets. Investors should consider our non-GAAP financial measures in addition to, and not as a substitute for, financial measures prepared in accordance with GAAP.
